

MASON'S MAGIC SHOW

Expanded Notation Practice

After reading and discussing the children's book, "Mason the Magician: Hundreds Chart Addition," children may play this game independently or as a whole group "mix and match" activity to practice decomposing numbers to add.

Directions for independent practice ...

- ♥ run Card Set A on one color ditto or construction paper and Card Set B on a different color
- ♥ children cut out Card Set A, place the cards face up on their desks, and mix them around so that they are spread out
- ♥ next they cut out Card Set B, mix them up and place them in a pile, face down, on their desk
- ♥ they draw one of the B cards and find the match from the A cards

I have my children glue the pairs together on a large page of construction paper and then decorate their "math posters."

Directions for "mix and match" game ...

- ♥ run card sets on the same color construction paper (laminiate if you wish to use this activity another year)
- ♥ each child will have one card
- ♥ they walk around the room (quietly), switching cards with each other
- ♥ at your signal they partner up with the student that has the matching card to their card

Math makes
you really
smart!
